

# STORAGE SYSTEMS

## We organize your space by providing innovative and space-saving storage solutions...

### What drives us: space is valuable, use it well

In a world where space is becoming a scarce asset, we devote ourselves to making the most of every available square metre. Preserving historical collections, storing confidential documents safely, shaping inspiring environments and enabling a whole new way of working... These are just a few examples of how our solutions can help your business. At Storage Systems Limited we are dedicated to creating workspaces that are stylish and functional, in order to make your work easier.

Whether you need a storage solution for an office, museum, archive, library or something completely different, our ethos is always the same. We believe in partnership working; involving you in the development of a solution that suits you in every detail, tailored to your every need. With a focus on innovation and teamwork, we offer you the best solution for your business.

## Core Values

### Customer Satisfaction

To achieve this, we work closely with our customers to develop a solution that suits you in every detail, adapted to every requirement. A solution that will match the dynamics of the working environment, efficiently and beautifully. And will be produced according to our environmental-conscious methods. Solutions by Storage Systems Limited create efficient, office, archive, museum, library and repository storage and add to a pleasant working climate.

### Health & Safety

Health & Safety is our No.1 goal, whichever storage solution we develop for you, it will be designed, manufactured and installed to the latest health & safety standards and requirements.

### Quality

Our products conform to leading international quality standards and are certified by independent experts in this field.

### Customer Oriented

The satisfaction of our customers is our main principle. We listen to your needs, desires and demands and make every effort to meet your expectations.

### Excellence

We acknowledge that market leadership is hard won and should never be taken for granted. In order to retain our market-leading position, we continually seek to improve performance in every area and at every level of our organisation. We are passionate about what we do and driven to excel in every aspect of our business.

### Environment

Improving our environmental performance is a major part of our corporate responsibility policy. We seek to work with our customers to reduce waste through design and specification changes and the use of sustainable products.

### Innovation

With our knowledge and expertise we develop innovative storage products. We are always looking for new developments in our industry, which allow us to always offer an advanced and complete product range for commercial markets.

### Team Work

Team work is the foundation around which everything revolves. Mutual respect, commitment, helpfulness and trust are conditions which we greatly value.

### Integrity

As a cornerstone of trust, integrity is crucial to all human relationships. Our success is predicated on treating those we work for and with, in the same manner as we would wish to be treated ourselves, with a commitment to honesty, respect, dignity and fairness.

Whatever your requirements, we offer storage solutions that meet and exceed international standards for quality and sustainability.

At Storage Systems Limited we set the standard when it comes to delivering the highest quality products. Whichever storage solution we develop for you, it will be designed, manufactured and installed to the latest quality standards and requirements.

Quality is at the heart of our corporate culture and our company is fully committed to providing a high quality product and service offering in everything we do. We strive to provide our customers with excellent service before, during and after the sale of one of our many storage products, always with an aim to exceed expectations.

The RAL certificates awarded for our products, including our 'one touch' electro solutions, are your guarantee for performance and reliability.

Your storage solution is made in our factory in the Netherlands, in accordance to ISO 9001 and ISO 14001. World-class manufacturing tools and methods implemented in our facilities allow us to produce your order with great precision in thousands of different configurations. We use mainly oil-free steel and have our powder coating processes integrated in line, which guarantees a 100% coating with epoxy powder.

Our commitment to reducing environmental impact extends to our customers, too. You can save money, time and energy by installing our mobile storage systems, reducing costs for lighting and cleaning, while gaining up to 50% more space for storage. Our innovative product will help make your business more sustainable, giving us the edge over our competitors.

## Let's create new ideas together

We believe in the power of partnership, working closely together with interior designers, architects, project managers, office innovators and customers we can help you create a smart, space-gaining solution. We bring you multifunctionality and flexibility, for whatever way you want to work. With our research and development department and an experienced customer support team, we are able to design and adapt our products to every need. Choosing our Bruynzeel products also means quality and sustainability are guaranteed. The Bruynzeel factory in the Netherlands has been awarded ISO9001 and ISO 14001 certification.

## Archive Solutions

Your objects of historical value and legal documents deserve intelligent storage solutions

Keeping your archive safe and accessible at the same time: that is an archivist's greatest challenge. Our smart, space-saving storage solutions are exactly what you need.

Whether you require short-term or long-term storage, our archive solutions offer a space-efficient and accessible storage system. Taking full advantage of the every cubic centimetre you will gain up to 100% of extra space.

Depending on the size of the items in your archive and how often you need to access them, we will create an archive to suit your requirements. Our products meet all major international quality and safety standards. Your installation will remain flexible and reliable for many years to come.

As your archiving partner we do not just sell shelving, we develop smart, user-friendly, clear, intelligent and custom-designed solutions that provide you with the functionality you need.

# Office Solutions

## A pleasant work place is an efficient workplace

Your office is more than just a place to work in. It is a dynamic environment, which despite the limited amount of space, should inspire as well as provide the peace and quiet you need to concentrate on the job at hand. An attractive environment, where you can move around comfortably, knowing that each document or file can be retrieved easily and conveniently.

Our office mobile shelving offer efficient utilisation of storage space. Mobile shelving units are easy to use and effortlessly moved. The best operating safety is attained while the protection of documents or secure storage ensures confidential filing.

Office mobile shelving have many advantages over fixed cabinets in terms of efficient utilisation of space. Only one access aisle is needed. The mobile shelving can be moved singly or together, to create an aisle where access is required.

With floor space been at a premium cost nowadays, the extra room gained can be utilised for more storage, a meeting or lounge room or to create an extra workplace.

## Library Solutions

Today's library is more than just books

Libraries are evolving from user-friendly book depots to multimedia hot spots. We have the storage and shelving solutions to help you make the transformation. Whether you require shelving for a public library, university library, research centre or school library, we can help you transform your facility into a more interactive, collaborative and user oriented space.

With a small targeted investment, you too can create a modern library fit for the 21st century where people can meet, interact and easily access the information they require, all under one roof.

Our solutions will help you design an inspiring library that will remain attractive to visitors in the digital age. As your partner we offer clear, intelligent solutions that create the right atmosphere and get the very most out of the every available square metre.

# Museum Solutions

## Create the storage your collection deserves

Your irreplaceable collection deserves to be stored in a safe, secure and accessible environment. Storage Systems Limited are specialists in museum storage, having supplied some of Ireland's leading museums and galleries over the last 40 years. We understand that your collection should be safely stored and accessible at all times. Works of art should be easy to move, e.g. for exhibition, restoration, registration and documentation purposes.

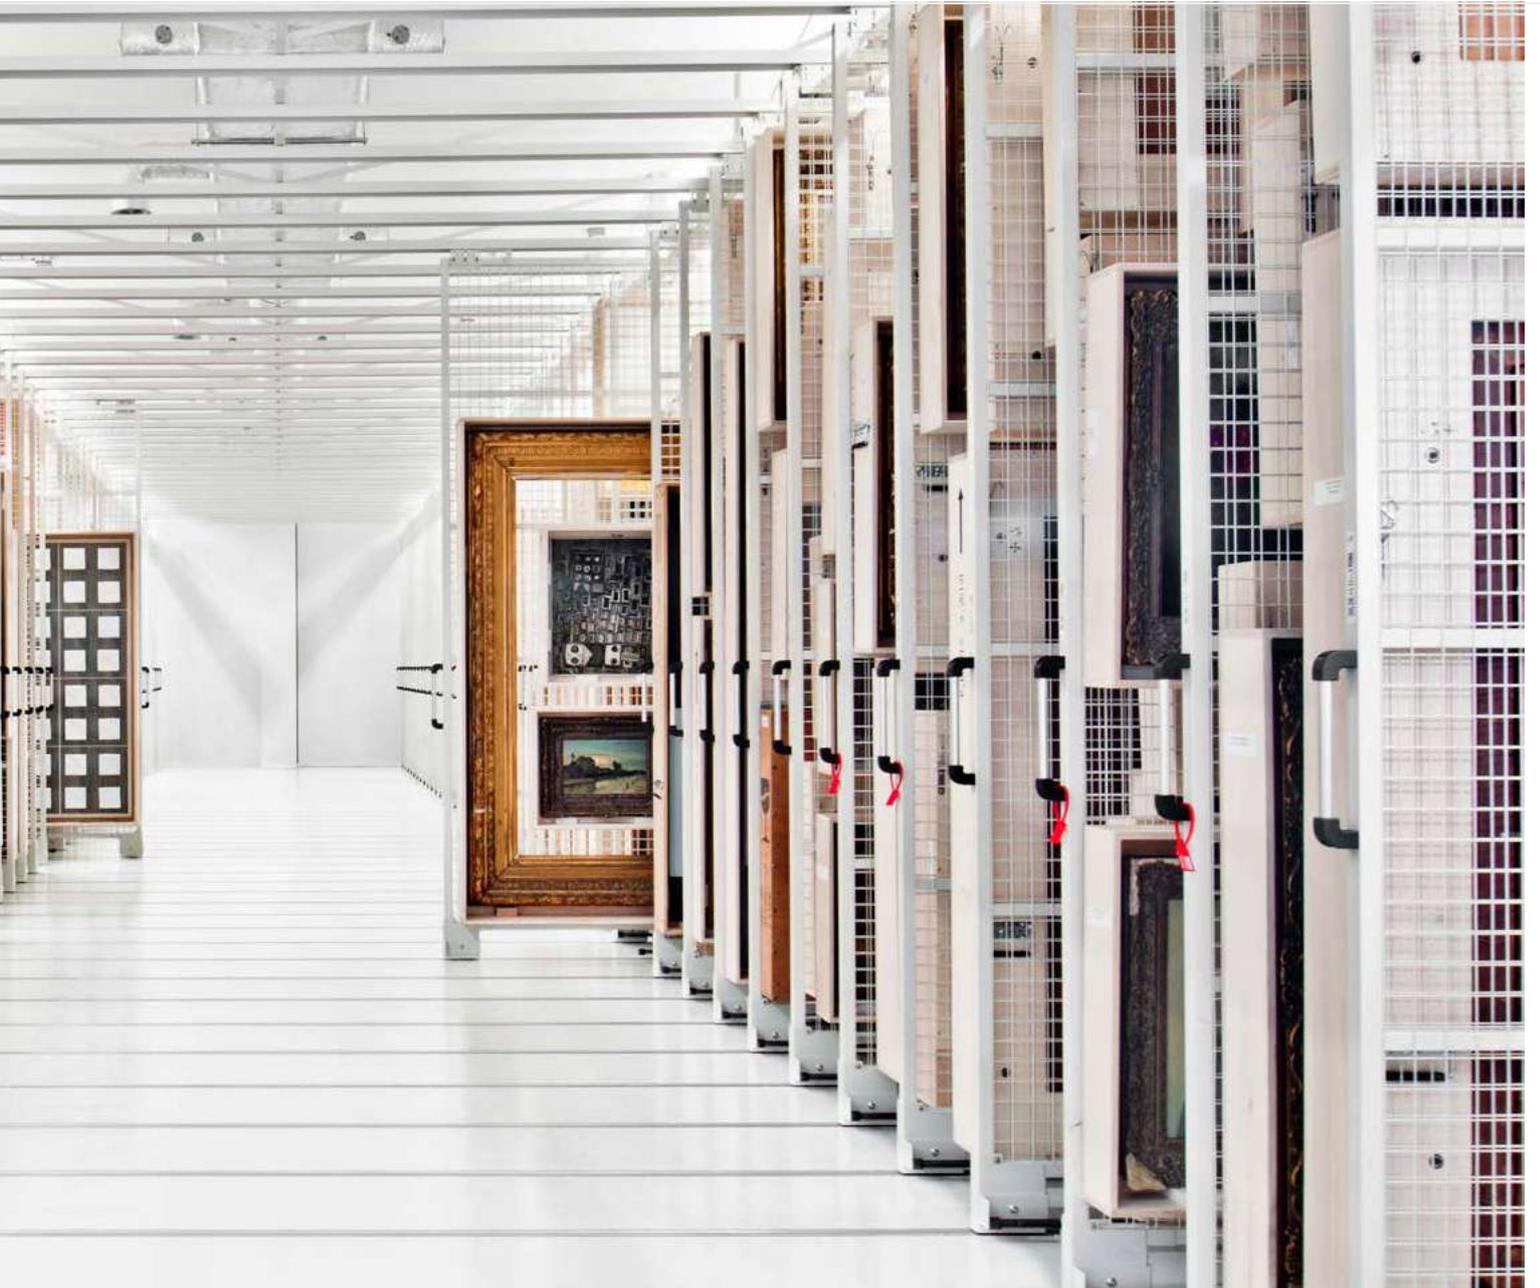

Our mobile shelving systems are easy to use, guarantee high safety standards and protection of goods. One of the most common issues is limited space. By using mobile shelving systems the number of aisles can be reduced and storage capacity can be increased.

A smart layout and design for your museum depot requires careful consultation. As your partner we can help you create a space-efficient repository, using the best-suited storage systems for the items in your collection. Together we will develop a tailored solution that matches your needs.

STORAGE SYSTEMS

## Office Partitions

Office Partitions gives you the flexibility to design the office layout to suit any situation

Our Office Partitions, Partition Walls and Glass Partitions are all demountable, allowing the office to be dismantled and relocated if required.

The different elements of glass, solid and demountable can be employed to create a bright and flexible work space and meeting acoustic requirements. Competitive advantage can be achieved through unique designed partitions displaying company branding, logos, manifestations, colour glazed units, digitally printed images.

Office Partitions also achieve outstanding fire, acoustic and structural performance through stringent testing. This guarantees the safest and widest product offering in the Irish commercial interiors sector and means our office partitions conform to building regulation requirements.

# Case Study

## Military Archives

President Michael D. Higgins officially opened the new Military Archives at Cathal Brugha Barracks in Dublin. The Military Archives were created as a flagship project, one of seven capital projects that will act as permanent reminders of the centenary of the 1916 Rising, the armed insurrection which changed the course of Irish history. The archives hold the archival records of the Defence Forces, the Department of Defence and the Army Pension Board.

### Secure storage of archive material

This new purpose-built archive facility allows for the consolidation of all military archive material, currently stored at a number of locations around the country, in one new national facility. It provides secure storage for 70,000 archive boxes, plus archival storage for 'special media' such as videos, film reels, photographs, microfilm, etc., which require specific storage conditions.

### Electronic mobile shelving

More than 22km of Bruynzeel electronic mobile shelving, which is designed to the highest international standards and provides an excellent storage environment, is installed over two storeys of this new building with links at two levels to an existing two-storey building of heritage value. The latter was originally designed as a Barracks Hospital and constructed circa 1903. The Barracks Hospital has been sensitively refurbished to provide a library with reading rooms, administration areas, new feature entrance and ancillary facilities for public access to the facility.

### WAV machines and wireless tablets

The electronic mobile shelving is over 4m high and is serviced by two WAV Machines so archive boxes located on higher shelves can be picked safely and with ease. The mobile shelving is supplied with remote control access via a wireless tablet connected to each WAV Machine. A router is installed at every static position to allow connection to the buildings wireless network. The user is able to open an aisle remotely by using the Bruynzeel app loaded onto the user's tablet.

### 4 hours of fire resistance

Due to height constraints on site, the new archives block is sunk by ½ storey into the ground, creating a half-basement for the lower storage level. Also due to tight programme to enable the project to be ready for the 2016 commemorations, the main structure consists of a precast concrete frame that has 4 hours fire resistance to meet archive facility requirements. This new facility has changed a part derelict site and existing unused barracks hospital building to an inviting and user friendly building, both for its staff and the visiting public, whilst also enhancing the surrounding community.

### High complementary

It is sympathetic to the existing buildings, which are of heritage value, and culturally as one of the flagship projects for the centenary of the 1916 Rising Commemorations. It provides a high class National Military Archive facility for both Department of Defence and Defence Forces material. The staff who will occupy this building have been highly complementary of the new facilities and of the benefits that it will bring them in their day-to-day work. This contract is the largest Installation of electronic mobile shelving in Ireland and we are very proud and honoured to be involved in this state project to celebrate the centenary of the 1916 Easter Rising.

### Results

- 22km of storage shelves.
- 140,000kg's of steel.
- 1,500 man hours of installation labour.
- 800kg's loading capacity per bay.
- 8,000kg's loading per movable carriage.
- Largest movable block is 88,000kg's storing 6,765 archive boxes which opens within ten seconds of a simply touch to the operational touch panel.
- Largest Installation of electronic mobile shelving in Ireland.
